The new Chisel D series pictured in genuine Rose Gold on a textured white tile. The Chisel D series combines the sculptured rectangular handles with stylish circular backing plates. Chisel D comprises a complete range for bathroom and kitchen and is designed to coordinate with Pegasi or Zeos Showers and accessories. Models shown **31795-85** and **30724-85**

INTRODUCTION

We are fortunate to be in a country where people have an eye for design, a feel for quality and a desire to create a space that is special.

At Faucet Strommen we have been building fine tapware in Australia since 1999. Our brand has gained a reputation built on impeccable quality, beautiful design and technical excellence.

You will find our 2017 Catalogue a valuable source book for inspiration and technical knowledge on tapware and bathroom products.

Enjoy our catalogue!

A close up of parts in the Pegasi production cell. Robust brass forgings, beautifully polished chrome cylinders and the finest quality European made ceramic cartridges come together in the hands of our skilled technicians.

BUILT IN AUSTRALIA

Faucet Strommen tapware, showers and accessories are built in Australia. Our factory and design studio are located in Kerang, Victoria, a quiet town on the Loddon River.

Here a team of skilled technicians hand build our tapware from thousands of parts. We use only the finest components made to our specifications in Australia and overseas.

We have recently complimented our range with the collection of Italian made Doccinox showers and the Silkstone range of baths and basins from Europe.

Let us build you something!

Faucet Strommen products are about superior design. Design is best described in a picture. Here the Zeos Tall Basin Mixer, finished in Switzrok Matte Black, creates a strong statement beside the Silkstone Elbe Basin. Zeos epitomises our design philosophy to create clean, elegant designs free of fuss and full of character. Models shown **35101-78** and **30821-33**

SUPERIOR DESIGN

We differentiate ourselves with superior design. A strong emphasis on engineering from the ground up and creating a product of supreme quality has made Faucet Strommen highly prized.

Great design starts from the concept. We have a vision of the most durable, most functional and most beautiful product. Ideas move to sketches, paper and pen diagrams, brainstorming and finally CAD drafts and visualisations.

Prototyping and testing of our designs gives us the chance for critical hands-on analysis before the design is locked in and moves to tooling and production.

We have a thing about clean design and will go to lengths to simplify and purify the aesthetics to realise a truly beautiful product that merges seamlessly with its surroundings.

COLOURS

In the following pages you will find an exciting array of special finishes for your Faucet Strommen products. We have embraced the trend in Australian interior design towards greater expression in colour and tone.

We have opened up your options by offering over 20 colours, available across almost our entire range, giving you unequalled freedom of coordination for your project. These high quality special finishes are applied in Australia and we offer fast turn around so you can start your project quickly.

Discover the earthy organic finishes like brass and copper, something timeless and warm. Imagine the Switzrok Matte Black finish or precious metals like our genuine Rose Gold. You can even combine different finishes on the same product. We'd love to talk with you about your project. We can discuss options and ideas to create your perfect space.

Be creative!

Whilst effort has been made to represent our special finishes as accurately as possible, please note that, due to the limitations of the printing process, colours shown may vary slightly from physical samples.

EARTHY TONES

We've created a collection of these delightful earthy tones.

There is something particularly inviting and relaxing about these finishes. Several of them are "organic" meaning that they are raw metal and as a result they will tarnish and develop a patina or change colour over time and from use. It is this feature that makes these finishes living and natural and has captured the designer's creative heart.

This collection works very well with stone, timber and natural materials and evokes a sense of timelessness.

-87 Raw Polished Copper This is an organic finish that starts off bright and shiny and becomes a deep red brown over time. This finish is becoming popular with designers. Areas handled more frequently will stay lighter than areas not handled.

-77 Brushed Nickel This durable finish is often used in bathrooms for its subtle brushed look. Brushed Nickel is warmer than brushed Chrome and works very well with stone and slate. This finish will become slightly dull over time but won't change colour.

-90 Raw Polished Brass This is also organic and will develop a patina over time. Polished brass starts off shiny and ages to a dull golden brown over time. Raw Polished Brass has been used for tapware for centuries. Naturally, brass alloys have visible variations of tone.

-93 Brushed Black Sapphire A deep medium grey with a metallic lustre, this is a subtle alternative to Matte Black or Brushed Nickel. This finish is durable and is becoming popular with interior designers. This finish won't change tone over time.

-91 Raw Brushed Brass This finish is organic and is the Raw Brass finish brushed back with abrasive to achieve a rich satin look. This warm textured finish will age with time and develop into a medium brown. Naturally, brass alloys have visible variations of tone.

-88 Gunmetal Medium grey finish with a satin velvet look and strong lustre. Appearance changes from bright grey to dark grey depending on how the light falls on the finish. This is a durable finish that won't change tone over time.

-83 Antique Brass Medium Being a deep, dark coffee brown this is raw brass that has been "antiqued" with a blackening agent. This organic finish has variations of tone and will age over time with higher use areas becoming noticeably lighter.

-85 Rose Gold Brilliant, shining finish popular with jewellery and high end tapware, rose gold has been included in this "earthy" tones collection for its distinctly copper hue. Although relatively delicate this finish will last well if properly cared for.

-84 Antique Brass Light This popular finish brings out the beauty of brass and is sought after in modern bathrooms. This is an organic finish that will change tone over time. Naturally, brass alloys have visible variations of tone.

-86 Brushed Rose Gold This subtle, coppery finish is achieved by applying precious rose gold and satin lacquer over a brushed base finish. Although relatively delicate this finish will last well if properly cared for.

COOL NEUTRALS

Modern architectural designs often call for neutral tones like brushed chrome, Matte black, White etc.

We have assembled our cool, clean finishes into this beautiful collection. They seem to complement each other and express a clarity and corporate air that befits modern bathrooms and kitchens. These finishes can be used in conjunction with each other. We have seen great results by pairing Matte black with a metallic finish like Brushed nickel, Chrome or Brushed Chrome.

These finishes will enhance modern décor and work well with concrete, whites, charcoals and other modern finishes without detracting from the colour you may use in your project.

-11 Chrome Tough, durable mirror-shining finish. Chrome remains the most cost effective finish for tapware and accessories and is the default finish having a long-standing track record. With proper preparation, like our thick sub layer of Nickel, Chrome will last for many years.

-55 Brushed Chrome A subtle brushed finish with a neutral cool tone. Chrome is applied over a brushed sub layer to achieve this popular finish. Brushed Chrome is durable and relatively cost effective.

-77 Brushed Nickel This durable finish is often used in bathrooms for its subtle brushed look. Brushed Nickel is warmer than brushed Chrome and works very well with stone and slate. This finish will become slightly dull over time but won't change colour.

-82 Polished Nickel Bright, shining finish that looks great in classical bathrooms and kitchens. Nickel is slightly warmer in tone than Chrome. Nickel is very durable and is often used on decorative fittings and musical instruments.

-78 Switzrok Matte Black The game changer in Matte Black tapware, this finish is unique to Faucet Strommen. Switzrok is very durable, does not show finger prints and has a smooth velvet finish. Switzrok is engineered in Switzerland.

-80 Switzrok Matte White This is very effective on bathroom fittings. Switzrok is unique to Faucet Strommen, durable and has a smooth velvet finish. Switzrok is engineered in Switzerland.

-88 Gunmetal Medium grey finish with a satin velvet look and strong lustre. Appearance changes from bright grey to dark grey depending on how the light falls on the finish. This is a durable finish that won't change tone over time.

-93 Brushed Black Sapphire A deep medium grey with a metallic lustre, this is a subtle alternative to Matte Black or Brushed Nickel. This finish is durable and is becoming popular with interior designers. This finish won't change tone over time.

BEACH & CITY

Whether you're fitting out a beach style bathroom, modernizing your favourite washroom or styling an inner city apartment, our Beach & City collection will bring you inspiration.

Discover the freshness of the neutrals with the vibrancy of rose gold. We have grouped all the modern favourites in a way that shows how blacks and white work with cool metals and rose gold.

-11 Chrome Tough, durable mirror-shining finish. Chrome remains the most cost effective finish for tapware and accessories and is the default finish having a long-standing track record. With proper preparation, like our thick sub layer of Nickel, Chrome will last for many years.

-78 Switzrok Matte Black The game changer in Matte Black tapware, this finish is unique to Faucet Strommen. Switzrok is very durable, does not show finger prints and has a smooth velvet finish. Switzrok is engineered in Switzerland.

-55 Brushed Chrome A subtle brushed finish with a neutral cool tone. Chrome is applied over a brushed sub layer to achieve this popular finish. Brushed Chrome is durable and relatively cost effective.

-80 Switzrok Matte White This is very effective on bathroom fittings. Switzrok is unique to Faucet Strommen, durable and has a smooth velvet finish. Switzrok is engineered in Switzerland.

-77 Brushed Nickel This durable finish is often used in bathrooms for its subtle brushed look. Brushed Nickel is warmer than brushed Chrome and works very well with stone and slate. This finish will become slightly dull over time but won't change colour.

-93 Brushed Black Sapphire A deep medium grey with a metallic lustre, this is a subtle alternative to Matte Black or Brushed Nickel. This finish is durable and is becoming popular with interior designers. This finish won't change tone over time.

-88 Gunmetal Medium grey finish with a satin velvet look and strong lustre. Appearance changes from bright grey to dark grey depending on how the light falls on the finish. This is a durable finish that won't change tone over time.

-85 Rose Gold Brilliant, shining finish popular in jewellery and high end tapware, rose gold has been included in this collection for its increased popularity in modern bathrooms. Although relatively delicate this finish, will last well if properly cared for.

-86 Brushed Rose Gold This subtle, coppery finish is achieved by applying precious rose gold and satin lacquer over a brushed base finish. Although relatively delicate, this finish will last well if properly cared for.

THE CLASSICS

Traditional bathrooms and kitchens in Australia often feature gloss white or almond tapware and fittings trimmed with gold or chrome. More lavish rooms may be fitted with gold tapware or gloss black.

We have collected the finishes that are most suited to classic bathrooms including 2 gold tones and the fashionable polished nickel.

-11 Chrome Tough, durable mirror-shining finish. Chrome remains the most cost effective finish for tapware and accessories and is the default finish having a long-standing track record. With proper preparation, like our thick sub layer of Nickel, Chrome will last for many years.

-33 Gloss White Our gloss white is a very tough, smooth and glossy powder coated finish. This finish is the perfect blend of hardness and flexibility. Our 6 stage pretreatment process and meticulous application make our gloss white among the finest in the industry.

-44 Gloss Almond Like our Gloss white, Almond is a smooth glossy tough powder coated finish. Often referred to as Ivory this finish is popular in traditional Australian bathrooms.

-22 Gold 23 Ct This is real gold plating as used on jewellery and clocks. 23 Carat Gold has a deeper, hotter tone than N18 Gold. This luxurious finish has been used for many years in lavish bathrooms. Although relatively delicate, this finish will last well if properly cared for.

-82 Polished Nickel Bright, shining finish that looks great in classical bathrooms and kitchens. Nickel is slightly warmer in tone than Chrome. Nickel is very durable and is often used on decorative fittings and musical instruments.

-92 Gold N18 This is real gold plating as used on jewellery and clocks. N18 is lighter in colour and less intense than 23 Carat Gold. This lighter shade is becoming increasingly popular for tapware. Although relatively delicate, this finish will last well if properly cared for.

-97 Brushed Gold N18 A new and sought after colour in our collection, the N18 brushed gold is subtle and looks like raw brushed brass, but does not dull or age over time. Although relatively delicate, this finish will last well if properly cared for.

Brass case shower head

These fine overhead showers feature brass casings for superior finish and longevity. The casing is manufactured using heavy brass sheet that is pressed into shape in a die to create the beautifully formed round or soft square shape for Pegasi & Zeos.

Even flow water distribution cartridge

Hidden inside the shower head is a clever water distribution cartridge. This channels the flow and distributes the water evenly over the face of the large overhead shower to create an even spread of flow for a comfortable and efficient shower experience. Water is directed through soft rub-clean silicone nozzles that resist lime scale build up.

Cleanly engineered upper bracket

The engineers have gone to pains to package the water inlet and diverter system into a minimalist assembly. The slide rail being the same diameter as the shower arm creates a seamless feel and a less-is-more architectural result.

Ceramic disc diverter switch

Dual showers are fitted with this high quality European made ceramic diverter providing long life and easy action. The lever rotates smoothly through 90 degrees switching effortlessly from overhead shower to handheld shower.

Smooth slide action & positive locking

The solid brass bracket slides effortlessly on the shower rail thanks to glide rings that have been fitted into the bore. Once at the desired height, the bracket can be locked to the rail by rotating the knob. An acetyl brake shoe contacts the rail and holds the bracket firmly in place.

Ball bearing click action adjustment

The brass holder that cradles the hand shower is fitted with Faucet Strommen's unique Rotaclick™ mechanism to provide positive and tactile angle adjustment. This uses a dimpled stainless steel disc and spring loaded ball bearings, a system that will provide accurate and easy adjustment without drooping for decades.

Adjustable bottom bracket

Dual showers and slide showers feature an adjustable height bottom bracket. The means that the bottom bracket need not be located at the extreme base of the rail, but can be shifted higher up to cover for example an existing mount hole from a previous rail shower.

THE NEW DUAL SHOWER

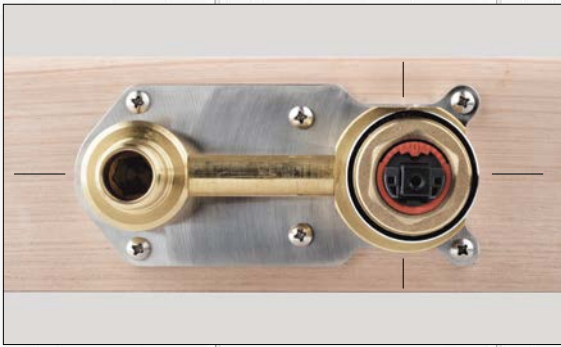

The brief was clear, the designers at Faucet Strommen must pen a clean and elegant dual shower that is functionally superior and of supreme quality.

In the winter of 2016 the first prototype took shape, the excitement was palpable, the result inspiring. They had taken the dual shower to the next level. We had to lock in the design. This would become quite simply the cleanest dual shower system on the market.

Dual Showers by Faucet Strommen represent a piece of Australian engineering excellence. This is world class design. From concept sketches to the drawing board, this product is the result of years of experience in technical design.

The discerning eye will appreciate the superior build quality and admire the craftsmanship. Time will prove the robust design. You will notice that there is weight to the product, testimony to the thick wall brass tubing used. Even the slide brackets and the casings of the overhead showers are solid brass.

The action is smooth and precise and the product feels robust. We have left nothing to chance and we have gone all out to produce the finest quality showers in the world.

Smartbridge™ in-wall breeching system

This clever breeching system is designed and engineered by Faucet Strommen and makes for effortless installation and the perfect fit-off. Smartbridge™ fixes to the timber noggin through a rock solid stainless mount plate. The plate features alignment marks and a flat top edge making precise positioning and levelling a piece of cake. Smartbridge™ holds the body and connector at precisely 90 mm spacing enabling fit off after tiling to be done quickly with no need for extra unsightly cover rings. Smartbridge™ allows for depth range to cater for various tiling thicknesses.

3 Spout lengths

Pegasi M and Zeos backplate mixers come with 3 spout lengths for complete flexibility. 150, 200 and 250mm spouts are available in Bath or basin flow rates.

Sleek Backplate

Machined from a piece of solid 3.6mm brass plate, the rectangular back plates are beautifully proportioned, petite and completely free of unsightly extra cover rings for a clean architectural result.

Recessed Aerators

Pegasi M Backplate mixers features tidy recessed aerators. This means no visible aerator joints for a completely clean and architectural appearance.

2 Stage Flowstep™ Water saving valve

Pegasi M and Zeos backplate mixers are fitted with Faucet Strommen's legendary 2 stage water saving valve cartridge. These are made in Germany and represent supreme quality and functionality. As you lift the handle the valve slides open, smooth and precise. Halfway through its movement it comes to a tactile step through which you can ease the handle to full open. This is the real world water saving feature. It is so simple to achieve gentle flow for hand washing and rinsing that even children will appreciate Flowstep™ beyond its water saving role.

THE NEW BACK PLATE MIXER

New to the Faucet Strommen range are the beautiful Pegasi and Zeos backplate mixers. Nicely proportioned, cleanly designed and cleverly engineered, these mixers are built to work seamlessly in modern bathrooms.

The sleek exterior is free of any unnecessary joints or fittings. The design flows. Like other products in this catalogue these mixers incorporate smart technology and are built to the highest standards. The ground breaking Smartbridge™ system makes for robust and effortless installation. The breeching system is built from solid brass and stainless steel and allows for precise positioning and perfect fit-off without fail.

The legendary 2 stage German made ceramic disc valves are tested to extremes to ensure the most durable and effortless action. The 2 stage valve system provides practical water saving functionality by creating a tactile half open position.

We have developed these mixers in both the Zeos and Pegasi styles. Zeos models, with their finely finishes flat spouts and handles, are available for bath or basin application and come with 3 spout lengths and all finish options for a complete solution. Pegasi models come with a choice of rectangular back plates or separate circular rings. Pegasi models are available for bath or basin application, come with 3 spout lengths and even a swivel gooseneck spout option for absolute flexibility in bathroom projects.

PEGASI

Pegasi is about perfect balance and crisp clean lines. Pegasi is round and minimalist and completely free of fuss.

We have developed this range to include a wide range of models and options to work with almost any situation in the bathroom or kitchen. Pegasi is a key collection for architects and designers due to the fine quality, the range of finishes available and the breadth of the range.

Pegasi comprises 2 mixer series, the large bold mixers and the new, more petite M series. Pegasi also includes a selection of showers, accessories and outlets.

2 Stage Flowstep™ cartridge

We use the legendary 2 stage Flowstep™ valves on Pegasi mixers. These cartridges, made in Germany, represent the pinnacle of quality and technology. The 2 stage system provides practical water saving functionality by creating a tactile half open position.
Read more on pg 17

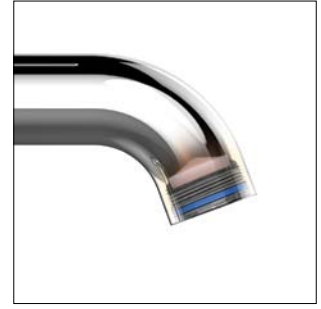

Solid Brass construction

Pegasi mixers are made from solid brass. Using Brass instead of zinc or plastic makes Pegasi very durable and allows us to produce these products in a range of finishes. Even the handles are forged brass and feature Faucet Strommen's signature milled markings.

Smartbridge™ in-wall body

Our unique new Smartbridge™ system is a feat of engineering. This breeching system built using stainless steel and brass takes the hassle out of plumbing in our wall backplate Pegasi mixers and provides a fast, sturdy set up for the perfect fit off.
Read more on pg 17

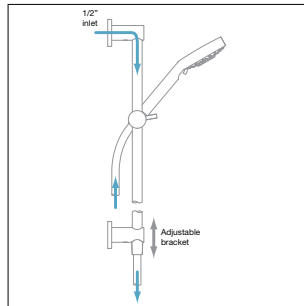

Recessed Aerators

The new Pegasi M series mixers and outlets feature recessed aerators. This eliminates unsightly joints on the end of the spout and provides a clean appearance. Basin and sink spouts are fitted with flow softening aerators. Bath spouts come with flow straightener inserts.

Rotaclick™ Slide bracket

Pegasi Slide & dual showers feature solid brass slide brackets fitted with the industry leading Rotaclick™ angle adjustment system. This mechanism uses ball bearings and a dimpled stainless disc to provide tactile, effortless adjustment of the hand shower angle.
Read more on pg 15

Inflow™ Rail system

The architectural inflow rail, thanks to integrated water flow, is a favourite for modern bathrooms. Water enters the top bracket and flows through the rail eliminating the need for a separate water supply elbow. Slide showers with the traditional elbow set up are also available.

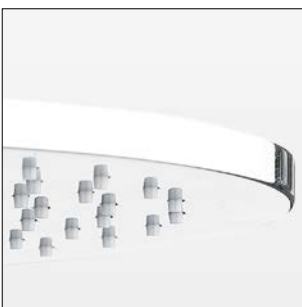

Slimline handshower

This sleek round handshower provides excellent performance and looks the part in modern showers. The slimline has a 100mm round face and features a slide selector to switch between spray and pulsating massage functions.

Micro handshower

The micro handshower is specially designed for performance. Despite a tight package, it has been engineered with precisely angled nozzles and provides a strong and well directed spray. Although machined from solid brass, the Micro is light to handle.

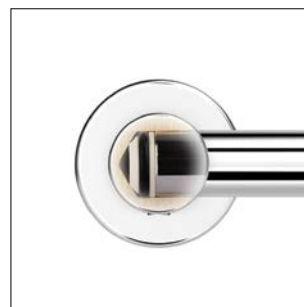

Brass Case Shower heads

Pegasi overhead showers are made using solid brass casings. The generous 250mm round heads are standard on Pegasi and provide a full drenching shower. Other sizes are also available. Brass case showers are superior in quality and finish and allow us to offer a range of finishes.

Ceramic dual shower diverter

Pegasi dual showers use a smooth ceramic disc diverter valve to switch water flow between overhead and handshower operation. This diverter is housed in a sleek upper bracket.

Snug fitting towel rails

The strong tubes used on Pegasi towel rails are fitted with nylon end plugs incorporating o-rings to make for a snug fit to the end brackets. This eliminates rattles and squeaks whilst maintaining the ease of cutting the rails to custom length.

Robust brass accessory mount

Pegasi Bathroom accessories fit to the wall with this sturdy mount system. Forged and machined from solid brass, this bracket screws to the wall with stainless steel screws and incorporates a mount lug with locating hole to ensure a rock solid mount that won't loosen or wobble.

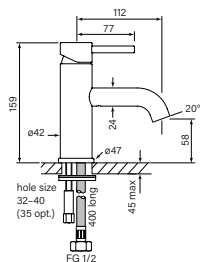

Pegasi M series sets a new benchmark for clean, architectural bathroom fittings. The designers have struck the perfect balance of proportion as every aspect of the form merges seamlessly with the whole. Hidden aerators and neatly fitted spouts enhance the new look. The Pegasi M Tall Basin mixer is perfect for vessel style basins like the Silkstone Elbe basin. This mixer offers generous height and reach. This mixer is also available in a medium height for basins that are semi-recessed. Models shown **30636-11** and **30821-33**

We created a special effect in this washbasin scene using textured white tile punctuated by the elegant Pegasi M Wall Basin Mixer Set in the Switzrok Matte Black finish. The white top and Japan-blackd mitred drawer complete the setting. Model shown **30655-78**

26

Black on Black. Tapware seems to merge with the dark charcoal wall tiles for an exclusive look. The entire Pegasi range is available in Switzrok Matte Black, an extremely tough finish that is both durable and velvety smooth. Achieve this exact look by using a recycled messmate timber benchtop and the satin white Silkstone Elbe basin. Models shown **30655-78** and **30821-33**

This is our latest sink mixer and features bullet proof build quality and excellent performance. This mixer comes with a curved spout with 220 mm reach and generous height making it ideal for workflow at the sink. Also available is the 160 reach spout well suited to prep bowl and bar sinks. The deep coffee brown of Antique Brass medium is becoming sought after in designer spaces. Model shown **30690-83**

There is a charm about Raw Brushed Brass. There is no plating on these taps, the raw brass is simply brushed up showing the lustre of the raw metal and the warmth of brass that we've come to love. Being an organic finish brass will develop a patina over time becoming a darker shade where it is not handled. Models shown **30655-91** and **30822-33**

This dual shower is a fine example of Australian engineering. Minimalistic, clean and robust, the Pegasi dual shower brings the new benchmark to dual shower design. This shower features a ceramic diverter switch allowing for overhead or handheld use and offers a generous 200 mm of height from the outlet to the shower head. The unique click action angle adjustment on the slide bracket gives positive firm positioning of the hand shower. This dual shower is available in 8 configurations and 20 finish options. This image shows the curve arm model with the sleek slimline hand shower in Switzrok Matte Black. Model shown **30671-78**

Here we have the Pegasi slide shower with a 900 rail and the smart "inflow" rail system. Water enters the upper bracket and flows through the rail eliminating the need for a separate water supply elbow for a clean architectural look. The Pegasi slide showers are the epitome of quality and come in a range of sizes and configurations. Model shown **30621-78**

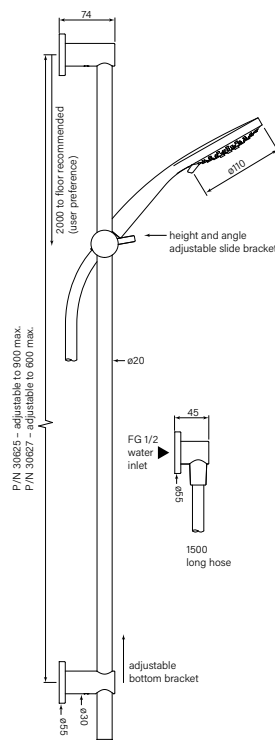

30621 Pegasi Slide Shower Inflow 900, 100sl

Pegasi Ceiling and wall showers feature a large 250 mm round brass cased shower head. This high quality shower has an internal cartridge system to direct the water flow evenly over the face of the shower for a comfortable balanced shower experience. Having a brass casing means these showers have a better finish, feel more solid and can be supplied in a variety of custom finishes. Ceiling droppers come in 100 mm or 300 mm lengths and extra lengths can be added on request. Model shown **30666-11**

Complementing the Pegasi mixer and shower range is a selection of fine Pegasi bathroom accessories. Designed and built in Australia to the same level of detail and quality these accessories feature solid brass construction with strong stainless steel or brass rails. They fit to the wall with forged brass double fix mounts so that they never come loose or rattle. Models shown **30711-11** and **30707-11**

ZEOS

This new range is an artful merging of rounds and soft squares. Zeos is beautifully minimalistic and clean whilst brimming with character.

Zeos comprises a full range of mixers, showers and bathroom accessories. The coordinated design makes this range a favourite with designers and architects and provides a seamless look throughout the project.

Zeos is designed and built in Australia and is available in 20 finish options. Supreme quality and new technology make this range stand out from the crowd.

2 Stage Flowstep™ cartridge

We use the legendary 2 stage valves on our Zeos range. These cartridges, made in Germany, represent the pinnacle of quality and technology. The 2 stage system provides practical water saving functionality by creating a tactile half open position. Read more on pg 17

Solid Brass construction

Zeos mixers are made from solid brass. Using Brass instead of zinc or plastic makes Zeos very durable and allows us to produce these products in a range of finishes. Even the handles are forged brass and feature Faucet Strommen's signature milled markings.

Smartbridge™ in-wall body

Our unique new Smartbridge™ system is a feat of engineering. This breeching system built using stainless steel and brass takes the hassle out of plumbing in our wall backplate Zeos mixers and provides a fast, sturdy set up for the perfect fit off. Read more on pg 17

Heavy Cast Brass Spouts

The Zeos soft square spouts are made from heavy brass castings. These are milled flat, polished and finished to produce the perfect form.

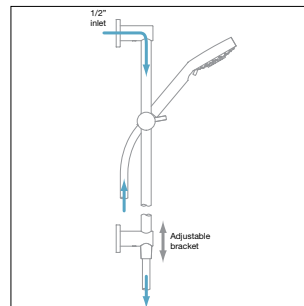

Clean CNC butt joints

For a particularly clean result, we have opted for CNC machined butt joints where the spout meets the body. Precise CNC machining of the spouts makes for the perfect crisp joint.

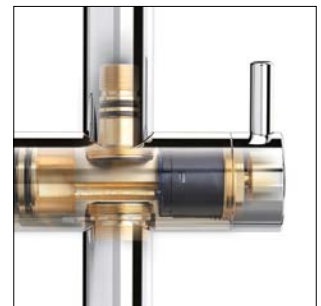

Rotaclick™ Slide bracket

Zeos Slide & dual showers feature solid brass slide brackets fitted with the industry leading Rotaclick™ angle adjustment system. This mechanism uses ball bearings and a dimpled stainless disc to provide tactile, effortless adjustment of the hand shower angle. Read more on pg 15

Inflow™ Rail system

The architectural inflow rail, thanks to integrated water flow, is a favourite for modern bathrooms. Water enters the top bracket and flows through the rail eliminating the need for a separate water supply elbow. Slide showers with the traditional separate elbow set up are also available.

Ceramic dual shower diverter

Zeos dual showers use a smooth ceramic disc diverter valve to switch water flow between overhead and handshower operation. This diverter is housed in a sleek upper bracket.

Zeos multifunction SQ handshower

The soft square face and sleek profile give this new handshower a pleasing shape tying it in with the Zeos mixers and accessories. This handshower features a click button function selector to switch between spray and pulsating massage functions.

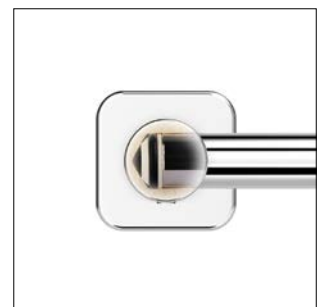

Brass Case Shower heads

The stylish square Zeos overhead showers are beautifully softened on the corners and feature heavy wall brass casings. Brass case showers are superior in quality and finish and allow us to offer a range of finishes.

Robust brass accessory mount

Zeos Bathroom accessories fit to the wall with this sturdy mount system. Forged and machined from solid brass, this bracket screws to the wall with stainless steel screws and incorporates a mount lug with locating hole to ensure a rock solid mount that won't loosen or wobble.

Snug fitting towel rails

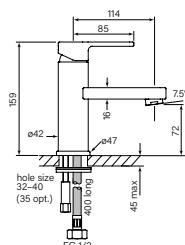

The strong tubes used on Zeos towel rails are fitted with nylon end plugs incorporating o-rings to make for a snug fit to the end brackets. This effectively eliminates frustrating rattles and squeaks whilst maintaining the ease of cutting the rails to custom length.

This powerful image presents the Zeos by Faucet Strommen. Launched in 2015 Zeos is one of the most likeable and stylish ranges of tapware in Australia. Designed and built in Australia and crafted from solid brass the Zeos mixers use a German made 2 stage water saving ceramic cartridge and are finely finished and meticulously assembled. This tall basin mixer works well with vessel style basins and provides ample height and reach. A mid height version is also available for semi recessed basins. Zeos basin mixers come in fixed or swivel spout versions and 20 finish options. Create your head turning bathroom with Zeos mixers and accessories. Models shown **35101-78** and **30821-33**

The photo shows off the fine lines and soft corners of the Zeos sink mixer. Zeos design is an artful merging of round and soft square elements creating stunning pieces for bathroom and kitchen. This mixer is shown in the organic Antique Brass Light finish. There is no plating layer on this tap, just raw brass that is aged. This finish is available across most models and will naturally dull and age over time. Model shown **35102-84**

The new Zeos slide showers use a soft square hand shower with click button and 3 functions. Notice the square back plates that coordinate the look with the mixers and bathroom accessories. The tasteful use of Chrome with Switzrok Matte Black and concrete give a vibrant feel to this shower. Model shown **35112-78/11**

CHISEL

Chisel is Faucet Strommen's latest range of 3 piece tapware and the apogee of style and quality. Chisel tapware features beautifully sculptured handles in either cross or lever configuration and comes with either the new "D series" flat disc flanges or the "retro" cone shaped flanges.

Chisel is a favourite with architects thanks to its clean lines and wide appeal. The new D series tapware is designed to coordinate with Zeos and Pegasi whilst the retro series tapware is complemented with matching accessories and showers.

Lever tapware with ceramic disc

The sculptured Chisel lever tapware features German made ¼ turn ceramic disc cartridges. This provides effortless operation and precise control and will last for many years maintenance free.

Cross tapware with ceramic disc

The Chisel cross tapware is available with high quality German made ¾ turn ceramic disc valves as an option. This luxury makes for effortless, precise control and will last for many years with no maintenance.

Durable Copper Jumpers

The standard Chisel cross tapware use highly durable Australian made Copper jumpers with polyurethane washers. These provide an excellent drip free seal with a light action and will far outlast the traditional black rubber jumpers.

Concealed Handle Fixing

Chisel cross and lever handles feature neat concealed attachment to the spindle. A threaded locking ring fastens in with a key supplied and clamps the handle firmly in place.

Tile Boot Seal

Chisel Wall top assemblies with cone shaped flanges are fitted with the unique rubber boot seal. Hidden beneath the flanges this fits over the valve body and seals against the wall tiles preventing splash water that runs down the wall from penetrating the wall cavity thus protecting it from moisture and damage.

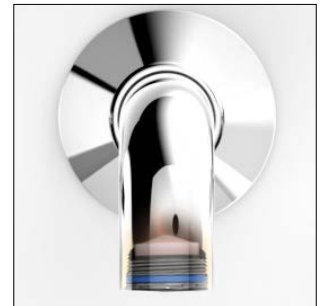

Flange seal keeps valve dry

Chisel taps incorporate a flange seal, this is a small ring seal where the spindle passes through the flange. This gives Chisel smooth wobble free action and provides a seal that stops water drips entering the flange and discolouring the basin.

Solid Brass Construction

Chisel taps, showers and bathroom accessories are made from solid brass. This not only means that it has a brighter, smoother finish, but that it can be finished in our full range of colours. Parts made from brass outlast zinc alloy by far making solid brass the material of choice for quality fittings.

Recessed Aerators

The new Chisel D tapware and outlets feature recessed aerators. This makes for a clean sleek appearance. Basin and sink spouts are fitted with flow softening aerators. Bath spouts come with flow straightener inserts.

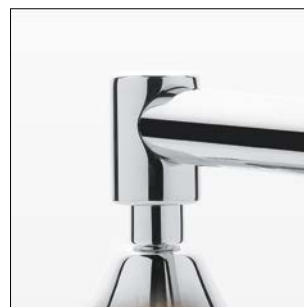

Slimline handshower

This sleek round handshower provides excellent performance and looks the part in modern showers. The slimline has a 100mm round face and features a slide selector to switch between spray and pulsating massage functions.

Brass Case Shower heads

Chisel overhead showers are made using solid brass casings. Brass case showers are superior in quality and finish and allow us to offer a range of finishes.

Snug fitting towel rails

The strong tubes used on Chisel towel rails are fitted with nylon end plugs incorporating o-rings to make for a snug fit to the end brackets. This eliminates rattles and squeaks whilst maintaining the ease of cutting the rails to custom length.

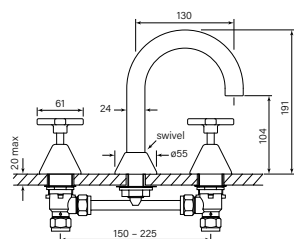

Robust brass accessory mount

Chisel bathroom accessories will never wobble or work loose thanks to the innovative mounting system. The solid brass forged mount block fixes to the wall with 3 stainless steel screws. The flange is forged with lugs that locate onto the Mount plate for exceptional stability.

The Chisel series of cross handle tapware combines retro elements like the cone flanges and curved spouts with the modernism of the cleanly sculpted handles. This range has proved popular in new and renovated bathrooms and comprises a complete range of tapware, showers and accessories. Model shown **31700-11**

When quality and durability count, you can't go past Faucet Strommen bathroom accessories. The Chisel double towel rail shown has flanges and mount brackets forged from solid brass making for rock solid mounting and corrosion resistance. Available in single or double configuration and 600 or 900 centre to centre length the towel rails are supplied with strong brass or stainless steel tubes for years of service. Model shown **31753-11**

**31750****Chisel Towel Rail Single, 900**

- Robust forged brass mount
- 900 mm centres
- Rails can be cut shorter as required

Perfect symmetry and a powerful design make this an outstanding studio photo. Chisel D series is a brand new range by Faucet Strommen combining all the quality and engineering of the Chisel range with a new stylish skin. The round minimalist flanges merge seamlessly with the soft rectangular bar handles creating these iconic pieces. Model shown **31792-78**

The D series from the front. Whites and new birch timber paired with Switzrok Matte Black make an attractive beach style basin setting. The Chisel D series tapware comes in a range of colours and is the latest 3 piece tap offering from Faucet Strommen. This tapware is a perfect match for the Pegasi outlets, showers and bathroom accessories. Here the D series wall taps are paired with the Pegasi wall basin spout. Note the identical flange diameter and coordinated styling. Model shown **31795-78** and **30724-78**

We wanted to show the beauty of metal. This is Brushed Nickel, a sought after finish in high end bathrooms and hotels. The Chisel D series wall mounted basin set was the perfect set to show off this subtle metal. Nickel has a slightly warmer tone than Chrome and light plays beautifully on the finely brushed surface. This Chisel D wall tap pair is available in ceramic disc for precise and effortless operation, here it is paired with the Pegasi wall basin spout. Models shown **31785-77** and **30724-77**

**31775****Chisel D Wall Tap Pr, Cross**

- Create sets using Pegasi wall outlets
- Coordinate with Pegasi showers, wall outlets and accessories
- Durable copper jumper valves
- Breech depth Max 19, Min 0

DOCCINOX

As if carved from a single slab of shining metal, Faucet Strommen's Doccinox range of polished stainless steel showers give you a new perspective, a new avenue to explore in creating the iconic bathroom. The clean, authentic shapes are mirror polished and softened to create reflective masterpieces that demand respect and admiration.

The stunning range includes wall showers and flush mounted ceiling showers. The discreet, minimalist design and generous dimensions create a perfect piece for the ultimate bathroom.

Doccinox Showers are crafted from bright stainless steel and contain an internal cartridge system meaning the shower water is contained in an insulated, efficient element for performance and comfort.

Doccinox™ Specifications

General

Optimum working pressure: 500 kpa

Working pressure range: 100 – 500 kpa

Max hot water supply temp: 60°C

Water Quality: Clean municipal water. Hard water should be pre-treated to prevent calcification.

Inlet Connection size: Flexible hose with F½" swivel nut.

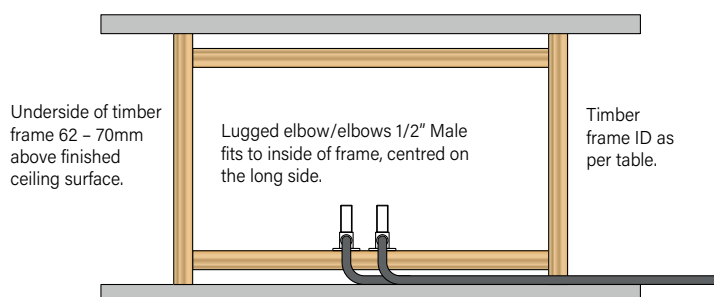

Minimum ceiling cavity: 100mm

WELS Rating: 0 star (Warning)

Timber frame dimensions

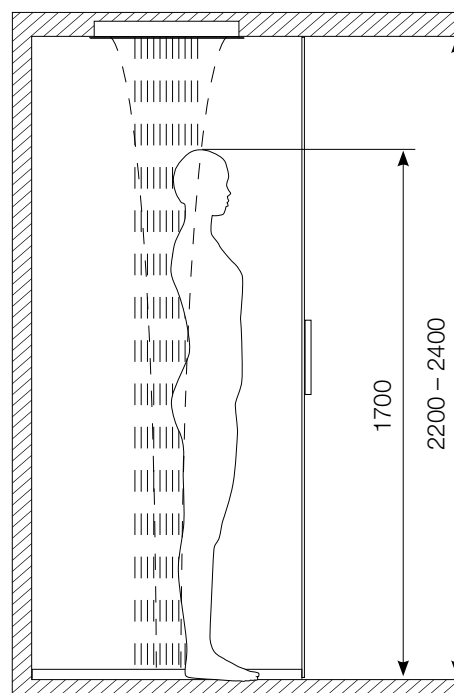

Ceiling showers are supplied with a steel support frame that fits above the ceiling. Builder to construct timber frame as per diagram below onto which steel frame fixes.

SILKSTONE

A Silkstone bath is a life investment. The tough, mineral rich Silkstone material combined with robust engineering and the renewable silky white finish make these products among the finest in the world. All Silkstone baths and basins are covered by a 25 year warranty.

This is European design and engineering at its best, simple and refined. Silkstone is characterised by clean, pure lines and sleek edges that fall away softly to a comfortable interior.

The unique dual wall design makes for a specially contoured inner shape for ultimate comfort whilst maintaining the exterior stylish designs. Silkstone baths come with discreet built in overflow waste and are noticeably free of superfluous fittings.

Supremely Engineered

Silkstone is an advanced, mineral rich engineered stone of immense strength and purity. It is hard, scratch resistant and homogenous. Unique mechanical properties and superior performance make it the best material for crafting the world's finest baths. Being cast, what you see on the outside is what is inside, perfect, smooth white stone.

The renewable silky finish

True to its name, a Silkstone bath has the unique satin smooth, hand polished P1500 surface. Silkstone has a superior look and feel and is easy to keep clean. The perfectly homogenous stone means that any small marks from wear over time can easily be buffed out and the surface restored to look like new.

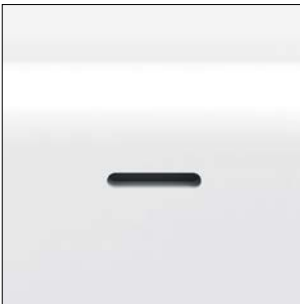

Dual wall design for comfort and energy saving

The progressive designers have developed the unique dual wall architecture offering numerous advantages over regular single wall stone baths. The dual wall allows for a comfortable contoured interior whilst maintaining the stylish external bath shapes for a more relaxed and ergonomic bathing experience. Dual wall also reduces heat loss keeping your bath water warm for longer and conserving energy.

Strong support chassis

To provide even, sturdy support for these baths and to ensure the weight is well distributed over the floor area, a robust welded aluminium frame is integrated into the base of each Silkstone Bath. This frame, hidden from view, is fitted with rubber feet that can be adjusted for perfect levelling.

Built in overflow

Silkstone baths all come with a discreet built-in overflow. A neat machined slot allows overflow water to drain through a sealed tube hidden in the dual wall cavity. This hygienic solution also means there are no external overflow pipes or metal fittings that would spoil the sleek Silkstone look.

White Silkstone waste

Silkstone baths & basins are all fitted with this beautiful white waste plug with a durable & serviceable internal pop up mechanism. The absence of any visible chrome or metal fittings means Silkstone baths can be easily coordinated with taps of any finish.

Delivering the perfect bath

For your peace of mind, our baths are supplied in a protective plywood crate on a strong timber pallet so they arrive in pristine condition.

25 Year Warranty

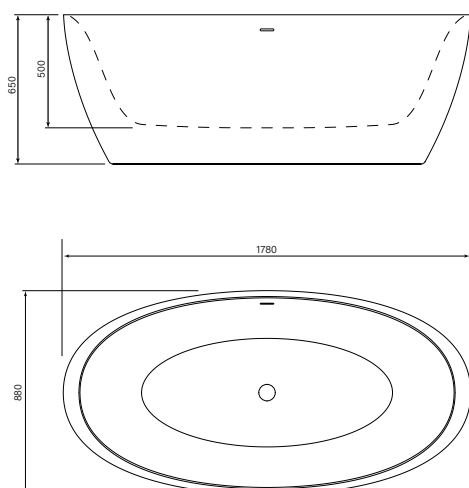

All Silkstone Baths and Basins by Faucet Strommen are covered by our 25 year warranty. Full terms of warranty are available on our website.

Warranty

Products Warranty – Australia

Faucet Australia Pty Limited (ABN 83 683 523 321) warrants its products to the original owner as per the periods in the table below. This Warranty applies to all product purchased on or after 24 Oct 2017. Our liability under this warranty is limited at our option to the repair or replacement of the defective product or part, the cost of repair of the defective product or part or the supply of an equivalent product or part, in each case if we are satisfied the loss or damage was due to a defect in the materials or workmanship of the product or part.

Product Category	Residential Warranty Period	Commercial Warranty Period
Tapware, Showers, Accessories	5 Years parts & labour + 10 years parts	2 Years parts & labour + 3 years parts
Intro Tapware	1 Year parts & labour + 4 years parts	1 Year parts & labour
Silkstone Baths & Basins	Lifetime	2 Years parts & labour
Special Finishes	5 Years parts & labour	2 Years parts & labour

Note: "Residential" refers to normal residential domestic purposes including houses and residential apartments. "Commercial;" refers to all non-residential purposes including Hotels, Schools, Care homes, Hospitals, clubs etc.

Exceptions

Defects caused by improper use, improper installation, surface damage caused by installation, improper care of the product or failure to observe any one or more of the following will not be covered by this Warranty:

- 1) Applicable Health Acts;
- 2) Installation in accordance with manufacturer's instructions and specifications (Note: Tapware, mixers and filters must be installed by qualified plumber);
- 3) All products to be cleaned with only warm water and a soft clean cloth
- 4) Tapware and showers to be supplied with only clean potable water
- 5) Tapware and showers to be subject to no more than 700kpa whether during use or during site testing.
- 6) Tapware and showers to be subject to water temperatures no hotter than 65 degrees Celsius
- 7) Tapware and showers to be installed in compliance with AS5200 and other standards which govern the water supply and sewerage plumbing requirements at the location of installation.

Limitations

- 1) Warranty does not cover fair wear and tear on sealing rings and washers. Depending on usage and conditions these may have to be replaced within the Warranty period;
- 2) For finishes, this warranty does not cover damage caused by use of chemicals or detergents or abrasives and is limited to coating failure by bubbling, cracking or flaking. Note that Organic finishes are expected to change colour, develop patina and verdigris.
- 3) Does not cover any loss or damage sustained by the consumer (including consequential loss or damage), in respect of the product or failure or omission on the part of Faucet Australia to comply with its obligations under these conditions.
- 4) For Baths & Basins, The warranty does not cover damage caused by exposure to direct sunlight or UV, exposure to temperatures over 60 degrees Celsius, damage caused by dropping sharp or heavy objects.
- 5) For Baths and basins this warranty does not cover damage caused by Strong Chlorinated solvents, Chloroform, Chlorobenzene, Nail polish remover, Methylene Chloride, Acetone, Turpentine, Ethyl Acetate, Acids, Ketones, Phenols, Ethers, Drain Cleaner, Toilet Cleaner, Salts, Oils, Milks and bathwater additives, non-approved liquids or Chemicals.

Lodging a claim

Claims must be lodged immediately or within 3 days of detection. Proof and Date of purchase from a Faucet Strommen dealer along with site details and contacts will be required to process a claim. All claims must be lodged with Faucet Australia via one of these methods:

Phone: 03 5450 4236

Email: sales@faucetstrommen.com.au

Mail: PO Box 271 Kerang VIC 3579

Your costs in making a claim under this warranty, including all freight, collection and delivery costs are to be borne and paid by you. We also reserve the right at our cost to inspect any alleged defect in the product wherever it is located or installed or on our premises.

Other Conditions

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

All prices RRP AUD including GST. Valid for Australia from 1 May 2019. This price list replaces all previous price lists. These prices are recommended retail prices and there is no obligation to comply with the recommendation. This price list becomes void on issue of next price list, see Faucet Strommen website for latest issue.

Faucet products are being continually developed. Designs/specifications are subject to change without notice. E&OE.
