## Crafted In Australia

Making fine fittings at the Faucet Strommen works has become a craft. For nearly a quarter of a century we have been working with brass and our makers take pride in their work.

In our Kerang factory brass bars, plates and tubes are cut, machined and formed to create beautiful parts to exacting standards. Every step of the way men and women engage in the rewarding work of creating pieces that will ultimately be the finest architectural fittings in Australia.

Our tapware, showers and bathroom accessories are all made in Australia and we are excited to be building our country, creating jobs and developing our people. We have made significant investment in the latest equipment and techniques and have built a solid team inspired to be part of this.

Join us on this journey!

# Your Forever Taps

Faucet Strommen products are built to last. Whilst our products have a finesse and visual delicacy, they are made tough and will last for decades.

The materials we use are strong and durable. Every part is robust and tested against failure, every joint and swivel is engineered for the rigours of everyday use and each tap, shower or fitting is built to go the distance.

Such is our confidence in quality that Faucet Strommen products are backed by our outstanding **40 year warranty\***.

We have a name for service and support. We go further to satisfy our customers and provide industry leading peace of mind.

\* Terms and conditions apply, visit website for details. Extended 40 year warranty claimable by registration after purchase.

# Simply Beautiful Designs

There is a gracefulness about the brand. Clean lines, petite proportions and balanced form. We put a premium on design and go to lengths to create beautiful pieces.

Architectural fittings must have character and individuality, they must merge with spaces and ideas and enhance a room. This is Faucet Strommen design and we do not compromise.

The new brass construction premium 90 round handshower designed and made by Faucet Strommen in Australia.

# Engineered for Comfort

The smooth action and tactile feel are not by chance, our fittings are precision engineered and technically superior. We have pioneered new technologies and invented clever mechanisms that are built unseen into our products.

Innovative ideas to improve functionality and comfort are prototyped, tested and employed to bring you a product of unrivalled performance. It is about a merging of technical excellence and hands-on craft to create the finest fittings that set the engineering benchmark.

## Achieving fit and finish

There is a hum of high precision machinery in the workshop. A gleaming brass part is delivered from the conveyor of a high tech swiss sliding headstock turning machine.

Each component we turn is to exacting dimensions and machined with fine surfaces to close tolerances. Parts fit together beautifully and surfaces are aligned to provide slick action and long lasting performance.

We use torque control tools to assemble threaded parts and use quality seals and lubricant for long lasting performance.

# Our Environment. We Care

We care about our environment and enjoy the diversity of our country. We tread lightly and minimise impact to our surroundings.

We have invested in technology and programs to realise our commitment. A solar energy system provides electricity to our factory. Closed circuit filtration enables us to recycle process water in our finishing plant rather than send it to waste.

Perhaps most importantly, our smart, vertically integrated manufacturing model means material can progress from a solid bar through machining to polishing, finishing and assembly all in-house so parts can move on trolleys rather than in trucks.

## Plant A Tree!

Trees are beautiful.

They are an essential component of life on earth, providing protection and food for birds and small animals and oxygen for life.

Every Faucet Strommen owner can now be part of our exciting Plant a Tree program!

When you register your products on the website for warranty, simply tick the box to request a tree to be planted on your behalf and we promise to make it happen. Look out for news on tree planting progress!

# Brass Collected and Recycled

Faucet Strommen products are made almost entirely from brass. Unlike many other materials, this fine alloy of copper is infinitely recyclable providing significant environmental advantages.

We treat this metal as precious. Every shaving that falls from our lathes and every off-cut gets collected and recycled. Many of our parts are made from brass bar, tube or plate. This material gets turned, milled and bent and many processes involve **machining** to shape the brass into a component. Machining involves sharp cutters that shave off small pieces of brass **swarf**. This gets collected from each machine then melted down to create new bars.

This smart utilisation of resources means that nothing is wasted and each bar goes further.

*Ultra***Brass**

## Lead Free

For your peace of mind, at Faucet Strommen we produce all components in contact with drinking water from **Ultra**Brass. We have pioneered the use of this special lead free<sub>1</sub> copper alloy being unique for its health benefits.

Despite the Australian compliance standards allowing for small amounts of lead in brass (4-6%), we stepped ahead with **Ultra**Brass to eliminate this harmful metal. A report by health experts states, **Children younger than 6 years are especially vulnerable to lead poisoning, which can severely affect mental and physical development**<sub>2</sub>

**Ultra**Brass is bismuth free. Whilst the exposure to small amounts of bismuth may not be harmful, bismuth poisoning can cause pain, fever and bone weakness.

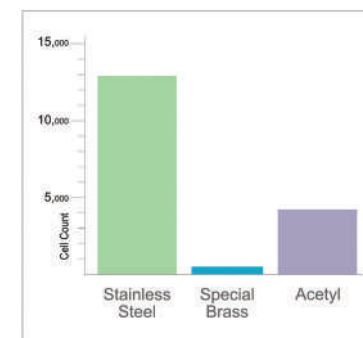

*Ultra***Brass**

## Fights Bacteria

**Ultra**Brass is a copper alloy and this is what gives it powers over bacteria.

Copper has antimicrobial properties and provides a level of protection against bacteria that can form in plumbing systems known as OPPP [opportunistic premise plumbing pathogens]. OPPP's **present an emerging waterborne disease problem**<sub>3</sub> and affects homes and hospitals.

**Bacteria, yeasts and viruses are rapidly killed on metallic copper surfaces**<sub>3</sub> when the cell walls are attacked by Cuprous Oxide (Cu<sub>2</sub>O). This makes copper alloys like **Ultra**Brass specially effective in reducing the build up of pathogens in potable water and providing a level of protection for you and your family.

## Comparing materials

When compared with Stainless Steel, Brass displays far superior antimicrobial properties. Studies via fluorescence microscopy show the results of bacterial colonisation on brass vs other materials after a 20 hour period. (See table alongside)

Whilst Stainless Steel is ideal for certain applications, tests to AS/NZS 4020 have shown up inconsistencies and cases of alloy break down and nickel leaching. We have chosen to manufacture parts in contact with drinking water from the more costly and superior **Ultra**Brass.

## Leading the way

At Faucet Strommen we have built our manufacturing on this advanced alloy. Whilst it is more difficult to work with in terms of hardness and machinability, it is far ahead of traditional brasses for strength, wear resistance and safety.

We made the decision years ago to employ this special alloy and it has placed us well ahead of compliance standards both in Australia and globally.

The strength and hardness of this material enables us to create smaller internal parts and build technology into tighter spaces making for clean and sleek product aesthetics.

<sub>1</sub> Lead free meaning less than 0.002 parts Pb. <sub>2</sub> Mayo clinic overview on effects of lead poisoning. <sub>3</sub> National Centre for Biological Information. NCBI

# Our Projects

Every job is unique. Personality and taste are rich and varied and the way finishes and colours are applied is so creative that every project becomes an expression and provides a tapestry of inspiration. Faucet Strommen has been part of the scene in thousands of projects across Australia and around the world.

## Homes

Faucet Strommen is a respected and sought-after brand with designers and homeowners. A home is a personal space, an area where design and fitment need to be individual. Faucet Strommen's products are chosen where superior quality, design and finish are not to be compromised and where they will be used, admired and appreciated for decades to come.

## Apartments and Hotels

Architects and designers get involved in producing the themes for luxury apartments and hotels. Beautiful textures and quality fittings are so important in these projects and communicate the critical message to the potential buyers or visitors. Faucet Strommen is featuring prominently in these luxury projects and architects love the wide range, coordinated designs and the personal way that Faucet Strommen works to bring each project to successful completion.

# Colour Swatches

## Ask us for samples

In the following pages you will find an exciting array of special finishes available with Faucet Strommen products. We have embraced the trends in interior design and developed beautiful colours for stylish spaces.

You will be glad to know that finish swatch discs made from real brass are available in each of our special finishes. It is always advisable to see a finish in real life before making your final decision. The name and colour code are etched into each swatch.

Ask us for samples for your next project and we will post them to you free of charge. You can call us or log your request on our website.

**-11 Chrome** A durable mirror like finish of chromium with tough sub layers long being the standard finish for tapware.

**-78 Switzrok Matte Black** This very popular special finish is beautifully smooth and sets the benchmark in toughness.

**-80 Switzrok Matte White** Velvety smooth white with a deep matte texture. Tough and stylish.

**-55 Brushed Chrome** A cool, neutral textured finish resembling brushed chrome created in Zirniium DMF.

**-72 Brushed New Nickel** A warm subtle textured tone resembling brushed Nickel created in Zirniium DMF.

**-52 Polished New Nickel** A shining subtle tone resembling polished Nickel created in Zirniium DMF.

**-90 Raw Polished Brass** This organic finish is raw brass polished shiny showing the various tones, and will patina.

**-73 Brushed Graphite** A neutral textured finish resembling graphite created in Zirniium DMF.

**-53 Polished Terminus Copper** A deep rich coppery tone created in Zirniium DMF.

**-75 Brushed Terminus Copper** A textured earthy red copper like tone created in Zirniium DMF.

**-76 Discovery Bronze** An earthy tone resembling weathered bronze created in Zirniium DMF.

**-91 Raw Brushed Brass** This sought after organic finish shows the tones of brasses and will patina.

**-84 Antique Brass Light** This organic aged brass is antiqued, relieved to a lighter tone and will patina.

**-83 Antique Brass Medium** A deep, rich chocolate brown aged brass which will patina.

**-51 Polished Liberty Gold** A rich and luxurious polished gold like finish created in Zirniium DMF.

**-79 Armada Bronze** A dark, moody tone resembling old bronze created in Zirniium DMF.

**-50 Polished Admiralty Brass** A warm and sumptuous tone with a nod to polished brass is created in Zirniium DMF.

**-70 Brushed Admiralty Brass** A textured warm brassy tone created in Zirniium DMF.

**-71 Brushed Liberty Gold** A rich textured golden tone created in Zirniium DMF.

**Organic finishes** – Please note that these finishes are organic raw metal finishes. These finishes will change over time based on the environment, handling and water splashes. This is the unique nature of these finishes and the reason that they are selected.

Zirniun DMF™

## Finishes at the pinnacle

Nothing can challenge **Zirniun DMF** finishes for durability, texture and pure beauty. From the deep Brushed Graphite to the subtle Discovery Bronze our rich palette of unique finishes gives scope for expression across our entire collection.

Direct Molecular Fusion (DMF) is the ultimate architectural finish and unrivalled in the industry. This process carried out at Faucet Strommen's factory in Australia employs specialised equipment and unique ingredients. Our inhouse engineers have developed the process over years in conjunction with chemists and experts from Europe. This finish is so hard and tough, and created with such robust processes, that it is almost impossible to scratch, displaying attributes that cannot be compared with traditional finishes.

In the interests of the environment, we have exploited advances in sub layer application, dry process technology and closed loop recycling to ensure the most sustainable process.

Zirniun DMF™

While effort has been made to represent our special finishes as accurately as possible over the following pages, please note that, due to the limitations of the printing process, colours shown may vary slightly from physical samples.

**Switzrok™**

## Quality in Black + White

Unique to Faucet Strommen, Switzrok sets the benchmark in superior Matte Black and Matte White finishes for tapware. Switzrok is an exceptionally durable finish, does not show fingerprints and has a smooth velvet finish.

Switzrok material is engineered in Switzerland and Faucet Strommen has invested in application technology to apply this finish in Australia. Switzrok is available with short lead times and has gained a remarkable following in projects over recent years.

## Organic Brasses

Lovely warm, earthy tones in this collection work well with stone, concrete and wood in modern bathrooms and kitchens.

The brasses have no plating, but rather show tones of the beautiful raw metal. Antique Brasses are raw brasses which have been aged with an oxidising solution. Raw Brushed Brasses and Raw Polished Brasses are the pure raw brass metals which have been either brushed or polished to show different textures.

All finishes on this page are organic meaning that they naturally change colour with handling, moisture and atmosphere.

## Zero Progresiv

### Perfect balance and proportion

01

Zero is proportioned and balanced for perfect aesthetics. The diameter of the handle is precisely the same as the flange creating a symmetry to pleasing effect.

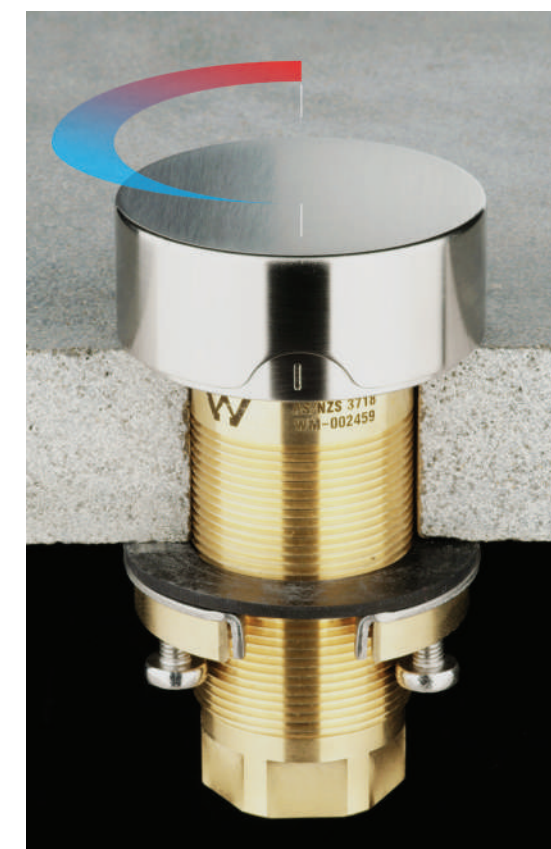

#### Wave shell and surface textures

The wave shape in the outer shell reveals the indicator ring and adds subtle interest to the design. Handles come in smooth, knurled or fluted texture and our collection of sought after finishes.

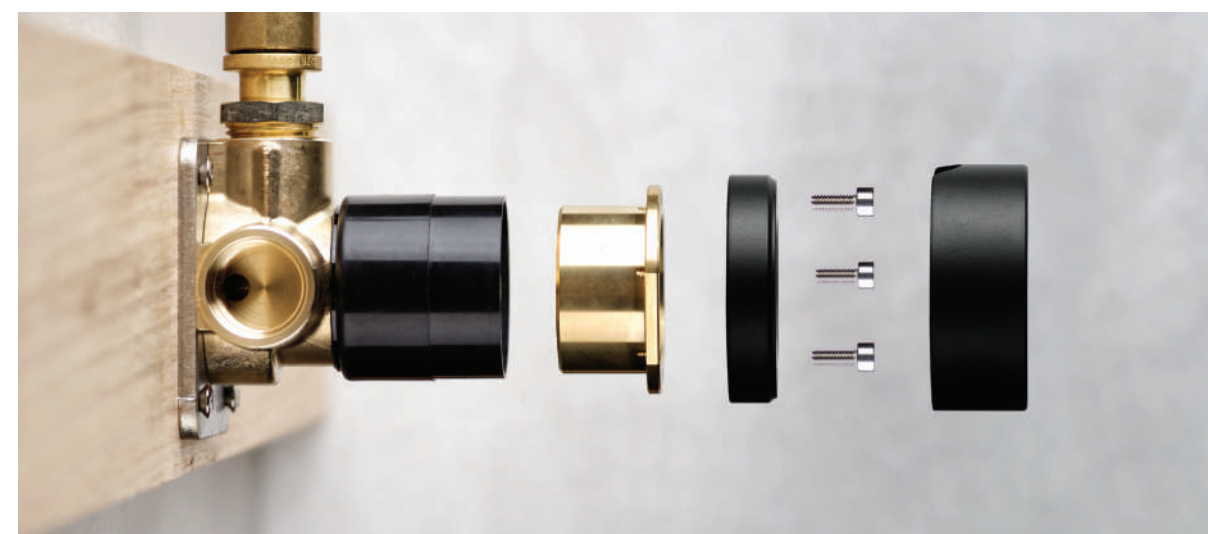

#### Progresiv - The intuitive 1-touch action

Zero features Progresiv action. The handle simply rotates half a turn. Cold water starts and flow increases as you move the handle through the first quarter, from there to half turn the temperature increases to hot.

#### Logikit In-Wall body for ease and flexibility

Zero uses Faucet Strommen's Logikit system which employs an in-wall body free of decorative components allowing for fast rough in and freedom of choice. Finish colour can be chosen later as fit-off parts are supplied separately.

## Kitchen Mixer

### The Benchmark in performance

02

The engineers at Faucet Strommen have crafted this masterpiece for the Kitchen. The new Kitchen mixer range sets a benchmark for performance, ease of action and durability thanks to innovative Strommglide™ and S-Flex™ technology. The S-Flex™ hose comes with a lifetime replacement warranty.

#### Strommglide™ PTFE Runway

This innovative PTFE sleeve fits inside the brass spout providing a low friction runway for the stainless hose. This creates class leading lightness and smoothness of action for superior ergonomics at the sink.

#### S-Flex™ Stainless Hose

S-Flex™ is the world's toughest pull out mixer hose. Made in Germany using a double interlock stainless coil, S-Flex™ comes with a lifetime replacement warranty!

Model: 30694-78

## Freestanding Floor Mixers

### Fine design and robust engineering

03

Floor mounted mixers are the best option when you have a freestanding bath as they allow complete freedom of position. We produce several models of floor bath mixers and spouts to suit various styles and all colours. You will notice the petite cover plates and clean designs thanks to clever engineering.

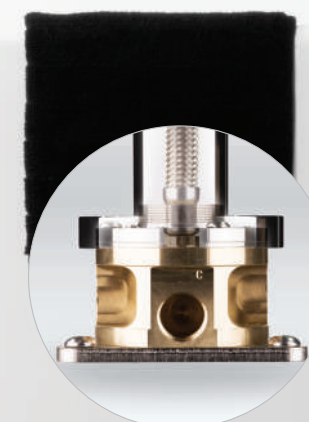

Model: 30661-78

Model: 30807-33

#### Sub Floor Body

A special sub-floor body is CNC machined from solid brass and provides a base for effortless rough-in and fit off. Strong Bolts fix the body to the concrete or timber joist and create a robust mount.

#### Levelling & Rotation

Our Floor mixers are fitted with a Stainless steel baseplate providing 360° rotational freedom. This clever design incorporates levelling screws for accurate adjustment at fit-off. A petite Ø90 x 14 cover plate fits over the baseplate for an architectural finish.

## The Dual Shower

### Simply the Cleanest Design

04

The brief was clear, the designers must pen a clean and elegant dual shower that is functionally superior and of supreme quality. We have used brass and stainless cased shower heads, heavy walled tube and fine components to produce the finest dual shower in the industry.

#### Even flow distribution cartridge

A clever water distribution cartridge channels water evenly over the face of the shower to create a comfortable and efficient showering experience. Water exits through soft silicone nozzles to resist limescale.

#### Ceramic disc diverter switch

We use a fine quality ceramic disc diverter switch for easy action and long service life. The lever rotates smoothly through 90 degrees switching effortlessly between showers.

#### Ball bearing click action adjustment

The brass cradle for the handshower features Faucet Strommen's unique Rotaclick mechanism using spring loaded ball bearings and a dimpled stainless plate to provide positive and tactile angle adjustment that will never seize or droop.

#### Smooth Slide action and positive locking

The solid brass bracket slides effortlessly on the rail thanks to glide rings that are fitted into the bore. Once at the desired height the bracket is locked to the rail by means of an acetyl brake shoe.

Model: 30673-78

## Back Plate and Wall sets

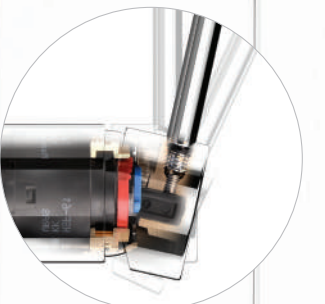

### Perfect proportions

05

The comprehensive collection of Pegasi, Zeos and Cascade backplate mixers and two piece wall sets incorporate clever technology and innovation behind the clean exterior. Ease of installation, perfect proportions and the scope of product options and sizes makes this range a favourite in projects.

Model: 30645-78

#### 2 stage flowstep water saving valve

All Faucet Strommen mixers are fitted with the legendary 2 stage water saving valve cartridge. As you lift the handle the valve slides open to a tactile step, move it past this step to achieve full flow. This clever system allows you to consciously save water every day and minimise splashing.

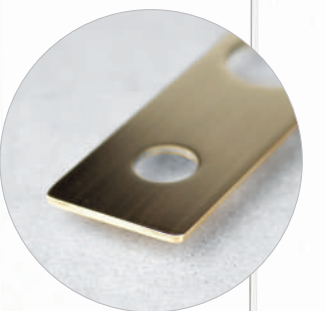

#### Recessed Aerators for a minimalist appearance

Pegasi mixers feature tidy recessed aerators meaning there are no joints at the end of the tube for a clean minimalist appearance. Three spout lengths make Pegasi, Zeos and Cascade versatile in projects.

#### Smartbridge™ in-wall breeching system

This clever breeching system designed and engineered by Faucet Strommen makes for effortless installation and perfect fit-off. This is easy to align, level and fasten and ensures that the spout and mixer bodies are correctly spaced.

#### Sleek solid brass back plates

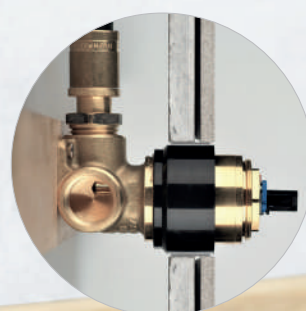

Machined from 3.6 mm brass plate, the rectangular backplates are perfectly proportioned and corners softened. The precise in-wall breech system means there are no unsightly extra cover rings or joints on the face.

## Logikit™ Rough-in body For Speed and Convenience

06

Logikit™ is a breakthrough innovation by Faucet Strommen allowing for significant reduction in project timeline and simplicity of planning. Logikit™ is a rough-in body system free of all decorative components whilst being completely operable for site testing. Logikit™ is available ex-stock from our factory for fast delivery and all decorative parts are fitted later meaning finishes do not have to be finalised before rough-in plumbing, reducing stress and complexity.

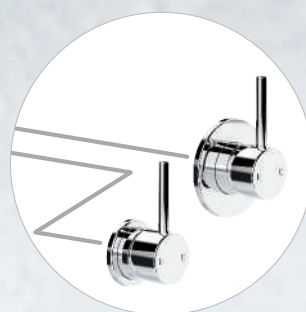

### Watertight and secure

A watertight shroud creates a barrier between back of wall and external parts for easy sealing so no splash water enters the wall cavity.

### Choose finishes later

With Logikit™ you have the luxury of choosing finish colours later as all decorative parts are attached at the end of the project giving you time to make the creative choice. You can easily update finishes in the future too.

### Each Logikit suits a family of models

With just a handful of Logikit™ types we provide for all wall and floor mixers in our range. The tables on pages 155-158 shows the kit codes to suit each model.

### Fast lead time to keep your project on track

Logikits™ are ex-stock from Faucet Strommen factory meaning that the rough-in stage of the installation can proceed without delay.

## Pull Down Sink Mixer A genius in the Kitchen

07

Modern kitchens are a place of action, conversation and energy. We have developed this impressive kitchen mixer with a practical pull down hose and industrial build quality giving you the tool to make things happen in your kitchen.

### Industrial quality hose

We use an industrial grade hose from Europe for our Pull down mixers. This provides a good balance of flexibility and rigidity. This hose comes with a lifetime replacement warranty.

### Acetyl anti-scratch nozzle

The lift out end features a clever acetyl nozzle to avoid scratching on the tap or your special dishes. This end fits snugly into the housing for a seamless appearance.

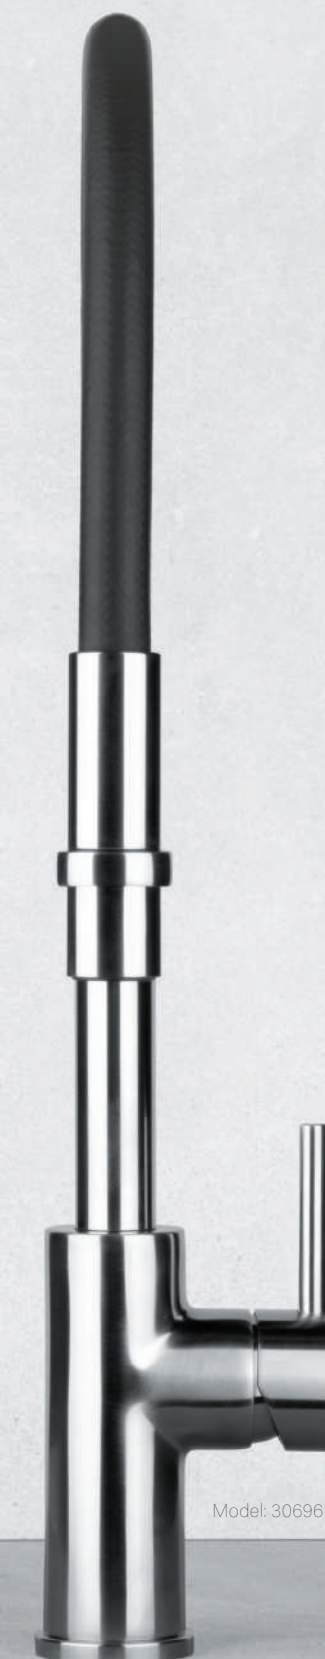

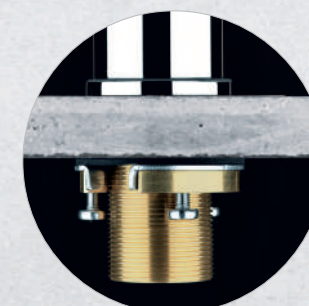

### Fine tolerance brass swivel for firm smooth action

The spouts is fitted with this CNC machined brass swivel incorporating acetyl slip rings and a robust brass collar for silky smooth action.

### Rock solid mounting

A brass sleeve provides even rigid mounting via a thick brass mount nut and stainless plate. Three Stainless screws make it easy to fasten in place with minimum effort.

Model: 30696-77

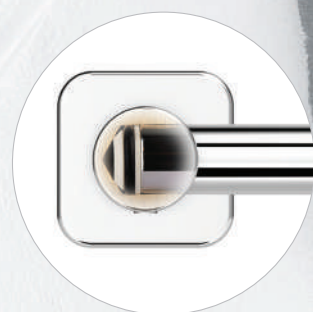

## Solid brass bathroom accessories In coordinated designs

08

We have developed 3 styles of exquisite bathroom accessories providing a coordinated collection across all styles in our range. This includes the classic Cascade style and the modern Pegasi & Zeos designs. We use the best brass and stainless materials to construct these and have found some innovative ways to produce the finest accessories to complement our tapware and mixer ranges.

Model: 35156-78, 35151-78

### Snug fitting towel rails

The sturdy brass or stainless steel tubes on our towel rails are fitted with nylon endcaps and o-rings providing a snug fit and eliminates rattles.

### Robust brass mounting system

Our bathroom accessories feature an innovative solid brass mount system ensuring rock-solid mounting that won't work loose over time.

### New minimalist NF series

The new Pegasi NF uses the same dual fix system, but the plate fits inside the bracket for a minimalist appearance.

## Chisel D lever series Stately and elegant design

09

The Chisel D lever series tapware feature handles milled from solid brass bar. Flat topped with 4 rounded corners and softened edges these stunning handles meet the flowing round elements of the flanges and spouts to create pieces of restrained luxury.

Model: 31791-78

### Smooth ceramic disc valves made in Germany

We fit all lever tapware with fine German Flühs® ceramic disc valves for outstanding life and smooth light action.

### Concealed handle fixing

Chisel lever and cross handle taps are fixed to the valve with this clever hidden fixing system.

### Spindle support gland

The unique silicon seal inside the flange holds out splash water and supports the spindle for rattle-free operation.

Model: 30322-84

## Bremont

Drawing inspiration from the clean lines and refined detailing of mid-century modern design, Bremont reinterprets the classics with a contemporary edge, suited to today's diverse interiors.

Crafted using the highest quality materials, the Bremont collection includes tapware, mixers, showers and accessories, available in all finishes.

## Pegasi

Pegasi is about perfect balance and crisp clean lines. Pegasi is round and minimalist and completely free of fuss.

Pegasi is Australian Made and includes a wide range of models and options to work with almost any situation in the bathroom or kitchen. Pegasi is a key collection for architects and designers due to the fine quality, the range of finishes available and the breadth of the range.

Model: 35101-78

## Zeos

Zeos is an artful merging of rounds and soft squares. Zeos is beautifully minimalistic and clean whilst brimming with character.

Zeos comprises a full range of mixers, showers and bathroom accessories. The coordinated design makes this range a favourite with designers and architects and provides a seamless look throughout the project.

Zeos is made in Australia and is available in 20 finish options. Supreme quality and new technology make this range stand out from the crowd.

Model: 35101-78

<b>\$293</b>	All other finishes (refer pg. 16)

Models: 30571-11, 30567-11 and 30574-11

## Cascade

The designers have created another beautiful collection, the new and expanded Cascade range by Faucet Strommen. Cascade is about restrained elegance; we have perfected a classic style whilst maintaining clean, architectural lines and perfect proportions. Stunning mixers and showers have been added in this exciting release making Cascade an outstanding selection.

Cascade is made in Australia and is part of our heritage, taking us to our beginnings, for this was the first style that our company ever produced. The original release, containing only a small collection of cross handled tapware was the first of Faucet Strommen engineering to be seen in showrooms nearly 23 years ago.

All Cascade models are produced entirely from brass meaning there are no plastic external components, enabling us to offer all 20 colour finishes throughout the range. Even our dual shower and pull out kitchen mixers are all of brass, offering unrivalled finish quality and performance.

Model: 30562-52

**30560**

Models: 31775-73 and 30724-73

## Chisel D

Chisel tapware features beautifully sculptured handles in either the cross or lever configuration and comes with clean and minimal disc style flanges.

Chisel is made in Australia and is a favourite with architects thanks to its clean lines and wide appeal. The D series tapware is designed to coordinate with the Pegasi range for all outlets, showers and accessories.

Models: 31795-83 and 30723-83

## Atico

Atico, the epitome of opulence meticulously crafted with unparalleled precision. This shower collection goes beyond the ordinary, redefining the very essence of luxury bathing.

A solid brass plate which sits gracefully flush against the ceiling, exudes a level of luxury that is simply unmatched. Crafted in Australia, Atico offers a choice between a subtle round design or a bold square variation, each customisable in all Faucet Strommen finishes.

Stepping beneath the cascading waters of Atico is nothing short of a lavishly indulgent experience. It stands as a testament to refined lifestyles, embodying the preferences of those with a discerning eye who demand nothing less than extraordinary.

Discover Atico, where luxury meets perfection. Immerse yourself in the extraordinary.

Product Installation

Products are supplied with detailed fitting instructions. It is important that these are followed and that installation of tapware is undertaken by a qualified plumber. We are available during normal business hours to assist with any installation enquiries, and you are welcome to call for help. Below are some important points relating to tapware and showers.

Must be fitted in accordance with AS/NZS 3500 by a qualified plumber.

Mains 500 kPa regulator must be fitted.

Maximum hot water temp. 65°C.

Mini stop taps must be fitted on hob mounted sink and basin mixers.

Water lines must be flushed prior to connection.

Only clean municipal water supply. No bore, dam or hard water without filtration & treatment.

Warranty

Please visit our website [www.faucetstrommen.com.au/warranty](http://www.faucetstrommen.com.au/warranty) for our full warranty document and related information.

Cleaning

Clean only with a soft microfiber or similar cloth and warm clean water. Ensure that the cloth is clean and free of any grit or chemical. Dry off with a soft clean cloth. Ensure that your product is not subject to any chemicals, building grit or any type of abrasive or polish. For care of special finishes please visit our website.

Certification

Faucet Strommen products are built to the highest standard. Models listed on the Faucet Strommen Watermark schedule comply with AS/NZS 3718 (tapware) or AS/NZS 3662 (showers). Faucet Strommen products comply with the WELS Regulation where applicable. Star and flow rating information appears beneath the product descriptions and licence numbers are available on the Faucet Strommen Website.
